Re:

US WEST Communications, Application for Rate Increase;

Docket No. T-01051B-99-0105

Dear Ms. Daniel:

Thank you for your letter urging the Commission to consider a different course of action for non-profit organizations with regard to telephone service billing costs. The issue you raise is one of rate design. U S WEST currently has a rate case pending with the Commission, with the hearing scheduled to commence on January 10, 2000. Your comments have been docketed as a permanent part of that rate case record.

Sincerely,

William A. Mundell Commissioner

Gentlemen:

I would like the utilities commission to consider a different billing cost for non-profit organizations, such as ourselves, which are 501(C)(3) organizations.

For example, we have only two choices for telephone service: Residential or Business Service.

As non-profits, more of our tax-deductible contributions should go towards underwriting those areas within society that cater to the public good, health, and welfare, within our specific niches.

Currently, our phone bills do not offer any price breaks. WE ARE NOT A BUSINESS in the sense of making a profit. And we should not be charged the same rates as if we were. Non-profits need a more equitable price structure.

FYI: I am including info on who we are and what we do. May I also direct you to our web site at: www.chaifoundation.org.

Will look forward to hearing back from you after you have given our suggestion some serious thought.

Thank you.

CHAÎ FOUNDATION

For Medical Research and Life Extension, Inc.

A Non-Profit Corporation

Eroca Daniel - Director CHAI Foundation

"An exciting cancer treatment breakthrough needs your tax-deductible donations today," says Eroca Daniel, Director of the CHAI Foundation. The CHAI Foundation is a 501(c)(3) non-profit corporation. It raises and provides funding to qualified researchers to facilitate the advancement of medical, nutritional, and related-technology leading to the development of drugs and therapies which save or enhance lives.

Your tax-deductible contributions will fund a grant for an eminent M.D., Ph.D. to corroborate exciting earlier animal test results. These results showed significant tumor reduction - without toxicity! This exciting research may offer real hope toward the conquest of cancer.

Earlier animal studies with "Protein-B" serum showed no sign of tumor in 40% and measurable tumor reduction in 30% - - remarkable results for a single drug! The doctor believes these statistics will improve in the future.

RESEARCH BREAKTHROUGH

Despite over 50 years of cancer research, scientists have not found a 'key' to cure cancer. This doctor's important work could be that key. His past test results on laboratory animals have shown "Protein-B" serum to be an advanced form of cancer treatment.

HUMAN TESTING

The Foundation's goal is to have the doctor corroborate his earlier animal test results, expected to take 12-14 weeks, to be followed by preliminary human studies (20-50 patients) in

accordance with approved medical protocols.

PROJECT COSTS

This grant project requires \$885,000 raised through public funds. Your tax-deductible charitable contributions will be used to fund; (1) animal tests, (2) human tests, and (3) laboratory equipment and research costs.

A HOPE FOR CURE

No cancer organization or drug company today can lay claim to a cure for cancer. 1998 American Cancer Society statistics state, "In the United States, men have a 1 in 2 lifetime risk of developing cancer, and

for women the risk is 1 in 3." We at CHAI Foundation are hopeful that our grantee's efforts will lead to a cure.

ITS UP TO YOU!

With cancer more prevalent than ever before, every family could be affected. Please help us help you or someone you love. Without your help, this promising work could become a missed opportunity in mankind's war against cancer. Can we count on you? Your contributions are fully tax deductible. We invite you to visit our website at www.Chaifoundation.org

A MUST READ-BEFORE YOU, OR SOMEONE YOU KNOW, OR CARE ABOUT, BECOMES A STATISTIC!

TO:

ALL NEWS MEDIA

FROM:

Eroca Daniel, Director

CHAI Foundation

DATE: 3 300 / / /

PAGES:

Today, 86 years after the founding of the American Cancer Society, their statistics state, "In the U.S., men have a 1 in 2 lifetime risk of developing cancer, and for women the risk is 1 in 3."

With such alarming statistics, every family could be affected.

In addition, cancer is the single greatest disease killer of children under age fourteen.

Therefore, each day we save that brings us closer to the conquest of this terrible scourge, will save considerable lives.

We are asking the public to join our "A Day in A Life" campaign by giving a tax-deductible donation to help the non-profit CHAI Foundation fund its current grantee, M.D., Ph.D., who we believe may have the key to the conquest of cancer, with possible application to AIDS.

The doctor has made a phenomenal NON-TOXIC cancer treatment breakthrough using a material designated "Protein-B."

He has successfully destroyed solid tumor cancers in 40% of test animals and demonstrated measurable tumor reduction in an additional 30%; a remarkable result for a single drug! He expects these statistics to improve in the future.

His grant calls for \$885,000. The first \$100,000 will cover a <u>I2-14</u> week corroborative study to test the medicine's effectiveness via oral administration. Its current use is by injection only.

The CHAI Foundation is a 501(C)(3) tax-deductible, non-profit, all-volunteer organisation dependent upon public support.

We need you now so that the results of this breakthrough can be there for you or someone you care about - if you ever need it.

Bighty-six years without a cure is long enough to wait!
